CURRICULUM VITAE

Ayoub *Sebah*

Project Manager · AI, Machine Learning, ERP & Data

Profile

Project manager with an international career between Morocco and Russia. I lead AI, machine learning, ERP and data projects from the first idea to delivery, translating business needs into clear plans and working software. Former Team Lead at X5 Tech, with experience at MTS and Dom.ru. M.Sc. in Computer Engineering. I work in Arabic, French, English and Russian.

Experience

Independent Project Manager & Consultant
2026 – Present
Freelance · Remote & on site
Leading AI, ERP and data projects for clients, from scoping to delivery.

Three roles in Russian tech
Aug 2024 – Apr 2026
Russia · after returning with residency

X5 Tech	Team Lead on a new delivery tracking solution, giving teams a live view of where every delivery is and its status.
MTS	Mobile software development.
Dom.ru	IT Representative.

Project Manager
Jul 2023 – Aug 2024
Vertx · Agadir, Morocco
Managing and designing projects end to end, from concept and planning to delivery.

Junior Web Application Designer & Manager
Jul 2022 – Mar 2023
RZNContext · Ryazan, Russia
Designed and managed web applications for clients.

Data Analyst
Sep 2021 – Jul 2022
Ryazan State Radio Engineering University · Russia
Processed documents and analysed data from institutional databases.

Data Analysis Intern
Jan – Jul 2019
AGRIDATA Consulting · Agadir, Morocco
Data analysis and reporting.

Web Development Intern
Mar – Jul 2018
AGANET Info · Agadir, Morocco
Built a web application for equipment management.

PM Tools

Jira · Confluence · ClickUp · Notion · Asana · Trello · MS Project · Miro

Domains

ERP design · Computer vision · Demand forecasting · Delivery tracking · Fleet & GPS · Telecom · Retail tech · IoT & smart city

Key Projects

Delivery Tracking Solution

X5 TECH · TEAM LEAD

New solution for tracking deliveries at X5 Tech, the technology arm of one of Russia's largest retailers, giving teams a live view of where every delivery is and what status it has.

Human Activity Recognition

AI · COMPUTER VISION

Computer vision system that watches a room through a camera, detects each person and recognises what they are doing, such as standing or walking, in real time.

Python · YOLO · OpenCV · PyTorch

Sales & Inventory Forecasting

MACHINE LEARNING · FINANCE

Machine learning model that predicts which products will sell best and when, so the business knows what to buy, how much to stock and the right period to sell. Built to support finance decisions.

B2B Fleet Rental ERP

CUSTOM ERP

Custom-built ERP for a company renting cars and trucks to other businesses, covering every department: fleet and rentals, contracts, maintenance, finance and HR, with live GPS tracking and per-vehicle cost analysis.

Project manager & concept

Hotel Maintenance & Scheduling

COLDEC · IRELAND

Web platform for a group of hotels bringing maintenance, staff scheduling and information sharing across all hotels and teams into one place.

Smart City Data Collection

IOT · RUSSIA

Designed data collection and storage processes so data from city sensors could be processed into useful information.

Affordable Medication Pricing

M.SC. THESIS

Web application that finds the cheapest medication options near the user, with automated market analytics on pricing.

How I Work
